182. 雨是怎么来的 | Where Does Rain Come From?

2026-11-04 · 下雨 Rain · 水循环 Water cycle

> 父亲和孩子聊起雨是怎么形成的。
> A father and child talk about how rain forms.

Speakers: A - 父亲 Father | B - 孩子 Child

A：今天怎么问这个问题呢！还问天上的雨是怎么回事?
jīn tiān zěn me wèn zhè ge wèn tí ne! hái wèn tiān shàng de yǔ shì zěn me huí shì?
What made you ask that today? You're even asking where rain comes from.

B：我想问就问。
wǒ xiǎng wèn jiù wèn.
I can ask if I want to.

A：我还说你们科学课又……
wǒ hái shuō nǐ men kē xué kè yòu ……
I thought you'd been learning about it again in science class...

B：科学课确实教了。
kē xué kè què shí jiào le.
We did learn about it in science class.

A：水蒸气遇到冷空气形成水滴，太重了掉下来就是雨。
shuǐ zhēng qì yù dào lěng kōng qì xíng chéng shuǐ dī, tài zhòng le diào xià lái jiù shì yǔ.
When water vapor meets cold air, it forms water drops. When they get too heavy, they fall as rain.

B：雨又变成水蒸气，又再上去。
yǔ yòu biàn chéng shuǐ zhēng qì, yòu zài shàng qù.
Then the rain turns back into water vapor and goes up again.

A：是啊，所以说是有些循环吗?
shì a, suǒ yǐ shuō shì yǒu xiē xún huán ma?
Yeah, so it's a kind of cycle, right?

A：你看，大海占地球 70%吧，大海的水太阳一照就挥发到天空。所以靠近沿海就经常下雨。
nǐ kàn, dà hǎi zhàn dì qiú 70% ba, dà hǎi de shuǐ tài yáng yī zhào jiù huī fā dào tiān kōng. suǒ yǐ kào jìn yán hǎi jiù jīng cháng xià yǔ.
You know, the ocean covers about 70% of the Earth, right? When the sun shines on it, the water evaporates into the air. That's why it rains a lot near the coast.

A：我们这边算下雨下得少了。
wǒ men zhè biān suàn xià yǔ xià dé shǎo le.
We don't get that much rain here.
